Free Network Assessment

Our complimentary assessment provides a clear, objective evaluation of your network's reliability, security, and overall health. We identify hidden risks, performance issues, and opportunities to improve stability and security — all presented in a simple, business-friendly report.

Understand your network before you invest:

- ✓ A review of your current network infrastructure
- ✓ Identification of performance bottlenecks and coverage gaps
- ✓ Evaluation of firewall, security settings, and segmentation
- ✓ Verification of best-practice configurations
- ✓ Risk findings and remediation recommendations
- ✓ A prioritized, step-by-step action plan

Clear insights that improve reliability — with zero pressure.

Network Design & Installation

We design, install, and modernize wired and wireless networks built for reliability, performance, and long-term scalability. Whether you're expanding, upgrading aging equipment, or restructuring your environment, our engineering-led approach ensures your network is secure, organized, and built the right way.

Build a stronger, more scalable network foundation:

Network Design & Installation (Wired & Wireless)

Build a reliable, scalable network foundation, tailored to your environment.

- ✓ End-to-end design for new and existing environments
- ✓ AP placement, switch design, structured cabling planning
- ✓ Clean, standards-based deployment with full documentation

Network Segmentation & Firewall Policy Design

Strengthen security and performance through smart, structured traffic separation.

- ✓ VLAN design and traffic separation
- ✓ Zero-trust access controls and least-privilege policies
- ✓ Firewall rule cleanup, optimization, and policy hardening

Wi-Fi Heat Mapping & Diagnostics

Identify coverage gaps, interference, and performance issues with a detailed wireless analysis.

- ✓ Visual heatmap of coverage and signal strength
- ✓ Interference & channel analysis
- ✓ Capacity assessment for high-density areas
- ✓ Recommendations for AP placement and tuning

Reliability, structure, and security — built into every installation.

Network Design & Installation (Cont.)

Our extended design and modernization services provide deeper visibility, improved performance, and long-term stability for your network. From documenting complex environments to planning future upgrades, we ensure your infrastructure remains reliable, scalable, and aligned with your business goals.

Strengthen reliability, visibility, and long-term performance:

Network Documentation & Audit Reports

Professional-grade documentation and audits that give you full visibility into your environment.

- ✓ Network diagrams, IP maps, and VLAN documentation
- ✓ Configuration and topology review
- ✓ Identification of risks, misconfigurations, and bottlenecks
- ✓ Clear findings with prioritized recommendations

Network Refresh Consultation

Plan your next upgrade with a strategic review of hardware performance, age, and growth needs.

- ✓ Assessment of firewalls, switches, APs, and cabling
- ✓ Upgrade and consolidation recommendations
- ✓ Vendor-neutral guidance based on business needs
- ✓ Lifecycle planning and budgeting support

Equipment Relocation & Rack Cleanup

Transform disorganized or outdated setups into clean, efficient, easy-to-manage racks.

- ✓ Rack redesign and cable organization
- ✓ Hot/cold aisle airflow considerations
- ✓ Proper labeling, patching, and documentation for easy maintenance

Know your network — plan ahead with confidence.

Managed Internet

Our Managed Internet service delivers fast, stable, and secure connectivity built for small and growing businesses. We handle the equipment, monitoring, optimization, and security, while you get predictable performance and a single point of accountability.

Choose the managed connectivity that fits your business:

Essential (Good)

Reliable connectivity with professional-grade equipment and proactive monitoring.

- ✓ Proactive monitoring of uptime & latency
- ✓ ISP vendor management & ticket escalation
- ✓ Monthly internet health report
- ✓ Automatic firmware/security updates

Business (Better)

Stronger performance and security for growing teams or multi-device environments.

- ✓ Everything in Essentials, plus:
- ✓ Cloud logging for detailed visibility
- ✓ SD-WAN configuration & Management
- ✓ QoS shaping for VoIP/business-critical traffic
- ✓ Advanced content filtering & application control

Premium (Best)

High-performance connectivity with enterprise-grade security and support.

- ✓ Everything in Business, plus:
- ✓ Multi-WAN / LTE failover support
- ✓ Full firewall management & optimization
- ✓ Full intrusion detection & threat protection
- ✓ Quarterly security & reliability reporting
- ✓ 24/7 on-call support & emergency response

Connectivity you can count on — performance, security, and support in every tier.

* Equipment leasing options available, billed separately.

* LTE data plans billed separately.

A La Carte Managed Services

Our a la carte services allow you to enhance security, visibility, and reliability without committing to a full support plan. Whether you need targeted monitoring, firewall optimization, or business-grade Wi-Fi management, these flexible add-ons strengthen your network exactly where it matters most.

Add targeted services to enhance security, visibility, and reliability:

Managed Firewall & Security Services

Strengthen your network with continuous security management and threat protection.

- ✓ Firewall policy design, tuning, and optimization
- ✓ Threat-intelligence updates and IDS/IPS oversight
- ✓ Web filtering and application control
- ✓ VPN, MFA, and access governance
- ✓ Quarterly security review with prioritized recommendations

Managed Router & Switch

Proactive monitoring and optimization of your network infrastructure.

- ✓ Configuration and change management
- ✓ Performance tuning and traffic flow optimization
- ✓ Automated backups and change tracking
- ✓ Firmware lifecycle management
- ✓ Troubleshooting and remote support for network issues

Managed Wi-Fi

Business-grade wireless management for performance, stability, and visibility.

- ✓ AP configuration, tuning, and firmware management
- ✓ Continuous monitoring of signal quality and client experience
- ✓ SSID and access control management
- ✓ Guest network setup with bandwidth controls
- ✓ Troubleshooting for roaming, congestion, and interference

Flexible services that strengthen security — and support your growth.

* Equipment leasing options available, billed separately.

Additional Services

These specialized services support unique projects, operational needs, and long-term business objectives. From hands-on training to security system integration and structured cabling oversight, we deliver the expertise needed to execute critical initiatives with precision and confidence.

Support unique projects with specialized expertise:

In-House IT Support Training

Hands-on training to equip your internal IT team with the skills to support and maintain your network.

- ✓ Instruction on network fundamentals and best practices
- ✓ Firewall, Wi-Fi, and switching basics
- ✓ Troubleshooting processes and escalation paths
- ✓ Security hygiene and access control training
- ✓ Customized content based on your environment

Security Camera & Access Control System Integration

Integrated video surveillance and access control design for secure, reliable physical protection.

- ✓ Camera and access control placement planning
- ✓ Network integration for clean, stable performance
- ✓ Role-based access and secure remote viewing
- ✓ System tuning for quality, retention, and alerts

Structured Cabling Project Management

End-to-end planning and oversight to ensure cabling is installed cleanly, correctly, and built for growth.

- ✓ Vendor coordination, management, and scheduling
- ✓ Cabling design based on site needs and code requirements
- ✓ Quality assurance throughout installation
- ✓ Labeling, documentation, and certification testing

Expert guidance that elevates stability — without unexpected surprises.

Let's Build a More Reliable Network

Ready to improve performance, reliability, and security? Let's build a network that supports your business.
